Student Attendance

An excellent attendance record is a top priority in the Lake George Central School District. The District acknowledges that frequent absences and/or tardiness lead to serious gaps in the educational sequence and subsequent understanding for future progress. To participate fully in class and to maximize academic growth, students must be present in school. It is the responsibility of parents/guardians to comply with New York State Education Law, which mandates that children be in attendance every day that school is in session.

The District is committed to an active partnership with students and parents in the task of ensuring that all students meet or exceed the New York State Learning Standards. District staff will make every effort to help students achieve positive and productive patterns of attendance. The District recognizes that consistent school attendance, academic success, and school completion have a positive correlation, and therefore has developed, and, if necessary, will revise a Comprehensive Student Attendance Policy to meet the following objectives:

- Increase school completion for all students;
- Raise student achievement and close gaps in student performance;
- Identify attendance patterns in order to design attendance improvement efforts;
- Know the whereabouts of every student for safety and other reasons;
- Verify that individual students are complying with education laws relating to compulsory attendance;
- Determine the District's average daily attendance for state aid purposes.

Description of Strategies to Meet Objectives of Attendance

The District will:

- Create and maintain a positive school-building culture by fostering a positive physical and psychological student-centered learning environment where the

presence of strong adult role models encourages respectful and nurturing interactions between adults and students, where everyone is welcome, important, and valued; where individuals experience acceptance and belonging; where individual and cultural diversity is recognized and celebrated; and where each and every student is guided toward personalized educational opportunities that enable them to thrive and contribute to the betterment of society. This positive school culture is aimed at encouraging a high level of student bonding to the school, which in turn should lead to increased attendance.

- Develop a Comprehensive Student Attendance Policy based upon the recommendations of a multifaceted District Policy Development Team that includes representation from the board, administrators, teachers, students, parents, and the community..
- Maintain accurate record keeping via a Register of Attendance to record attendance, absence, tardiness, or early departure of each student.
- Utilize data analysis systems for tracking individual student attendance and individual and group trends in student attendance problems.
- Develop early intervention strategies to improve school attendance for all students.

Student Code of Conduct

Discipline Philosophy:

Understanding discipline as a “teachable moment” is fundamental to a positive approach to discipline with the ultimate goal of teaching pro-social behavior. Therefore, the board authorizes restorative practices to be employed where appropriate. The use of conflict resolution methods and restitution to those harmed allows for misbehaviors to be addressed with the ultimate goal of teaching pro-social behavior. This approach seeks concurrent accountability and behavioral change.

The main principles of restorative practices are valuing and restoring relationships, repairing the harm done to affected parties, respecting others' opinions, and reintegrating into the school community.

Under this model, questions that may be utilized:

- What did you think when you realized what had happened?
- What impact has this incident had on you and others?
- What has been the hardest thing for you?
- What do you think needs to happen to make things right?

Essential to the implementation of restorative practices is helping students who have engaged in unacceptable behavior to:

- Understand why the behavior is unacceptable and the harm it causes;
- Understand what could have been done differently in the same situation;
- Take responsibility for their actions;
- Make reparations and or restitution to repair the harm done;
- Be given the opportunity to learn pro-social strategies/ skills to use in the future; and
- Understand that increasingly punitive consequences may be imposed if the behavior reoccurs.

While there may be more traditional punishments in conjunction with teaching behavior expectations and treating disciplinary matters as teachable moments, this is a more effective approach than merely reacting to specific events unless student behaviors pose an immediate or ongoing threat to the safety of other students and staff.

In the application of restorative principles, the process is always voluntary for the students. Any parent (or student over the age of 18) can request to go the traditional disciplinary route and not participate in the restorative process. This may happen at any time during the process, or if a student is unwilling to accept responsibility for their actions and is not demonstrating willingness to make amends.
